

EMT Student Program Learning Outcomes

Students will be able to:

1. Utilize therapeutic communication to care for culturally diverse patients.
2. Apply basic anatomy and physiology knowledge to assess and prioritize patient treatment to transport.
3. Identify life-threatening situations and demonstrate BLS skills.
4. Maintain professionalism and recognize moral and ethical dilemmas.
5. Utilize critical thinking to prioritize a medical or trauma patient, complete an appropriate assessment, and develop a plan of action.
6. Recognize, execute, and manage patients with appropriate medications according to their scope of practice in accordance with local and state protocols.
