

Social Science

Guided Pathway to Success - Year 1 (Sociology)

The Social Science pathway offers a broad range of programs within the area of social and behavioral science. As a field, social and behavioral science explores the connections between such fundamental concerns as human development, social behavior and historical analysis. Careers in Social Science include but are not limited to psychology, social work, counseling, political science, economics, and anthropology. Students should discuss the selection of pathway electives with their advisor as well as their intended transfer institution.

Extra-Curricular/Cocurricular Opportunities at ECC: In addition to clubs such as Phi Theta Kappa and Student Government Association, the Psychology Club at East Central College serves to provide an environment for students who express an interest in the Psychological Sciences. The goal of this club is to offer opportunities to increase understanding of the field, provide community service, and enrich students' social experiences.

Social Science

Guided Pathway to Success - Year 2 (Sociology)

Sociology studies social life, social change, diverse communities and their interactions, and uses scientific methods to find empirical answers to complex social questions. Studying sociology can help foster creativity, innovation, critical thinking, analytic problem solving and communication skills. The study of sociology provides a foundation for understanding and engaging with the globalizing world and to contribute solutions to difficult social problems.
